-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Response to Amendment

1. The indicated allowability of claims 22 and 23 is withdrawn in view of the reference(s) to Miyauchi et al (Japanese reference 59-215842). Rejections based on the cited reference(s) follow.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 15, 16, 19-28 and 41 are rejected under 35 U.S.C. 102(b) as being anticipated by Miyauchi et al (Japanese reference 59-215842: figures 1-13).

Miyauchi et al teach a molding apparatus comprising a multi-portion body defining a mold void (cavity 34), a conduit (31) for injecting resin into the mold cavity, and a plurality of clamping members extending at least partially into the mold cavity for clamping a sheet preform at its perimeter. Figures 3-5 illustrate the molded article wherein the sheet is clamped at its perimeter within the mold cavity. The multi-portion body consists of label location core (32), mold (36) and mold core (25). The mold (36) is resiliently biased against the label location core (32) by a spring (35). The language pertaining to label and labeling is intended use as the mold of Miyauchi et al clamps a sheet member within a mold cavity at the periphery of the sheet member and clearly capable of clamping a label therein.

Allowable Subject Matter

4. Claims 17 and 18 are allowed over the prior art of record for the reasons of record.
5. Claim 42 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims. Claim 42 is allowable for the reasons of record.

Response to Arguments

6. Applicant's arguments with respect to claims 15, 16, 19, 20, 23-28 and 41 have been considered but are moot in view of the new ground(s) of rejection.

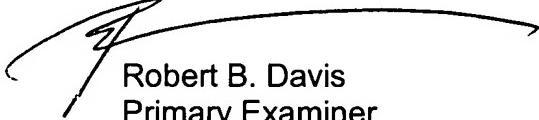

Drawings

7. The drawings were received on May 12, 2006. These drawings are not suitable for printing. Please see the attached PTO-948. The changes made to figures 2A and 7 are approved by the examiner.
